

# The Leading Solution in Fire Door Traceability

Door Data Systems is the most advanced system for the management of Fire Doors on the market.

## Demonstrating Compliance

Door Data Systems solutions are guided by current and incoming legislation, future-proofing your processes and ensuring you can demonstrate compliance.

## Working with Manufacturers

Door Data Systems partners with manufacturers to enable full traceability throughout the life of the fire door from its inception. The Door Data Pin is inserted at the point of manufacture and the door can be registered to the National Fire Door Register on installation.

## Fire Door Installation

The National Fire Door Register captures performance certification, installation guides and warranties, makes part listings easily available ensuring a door's integrity can be maintained during its lifecycle.

## Inspection

Legislation around inspections is changing, we can help you understand your responsibilities and implement systems to support them. The system supports stock condition surveys and ongoing regulatory inspections, providing key management data to accountable persons.

## Repairs & Maintenance

Recording works undertaken helps capture changes made in the door's history, Door Data provides easy access to reports ensuring corrective action is fully recorded.

# Our Partnership

## Who are Sentry Doors?

Sentry Doors is a specialist manufacturer of bespoke, high quality timber fire and security doorsets for the social housing, public sector, commercial and residential markets. Operating nationally from two state-of-the-art facilities in Doncaster, it has established a strong reputation for manufacturing products that meet the most rigorous quality and fire certification standards. Its commitment to regulatory compliance and high manufacturing standards has resulted in independent third-party accreditations from Certifire and BM Trada Q-Mark.

## Increased Safety for Sentry Customers

*"We are thrilled to have an open access solution powered by the leader in fire door traceability. The Golden Thread means making information on every aspect of a fire door's compliance easy to access. Our Golden Thread solution means that data is available via a simple app with no manufacturer's restrictions. That means better safety for our customers and increased efficiency for everyone in the fire safety industry."*
